Willian Vieira PhD

Data analyst and modelling specialist with a PhD in quantitative ecology. I build mathematical and statistical models using reproducible data workflows that turn complex data into validated, explainable outputs for operational decisions.

DATA SCIENCE & ENGINEERING EXPERIENCE

2025 | 2024 (1 yr 9 m)

Data Analyst & developer
Habitat, Montreal, Canada

Built Python/R analytical pipelines and data-processing workflows that turned messy real-world project data into standardized, validated model inputs, reports, and decision-ready outputs | Developed metadata-driven ETL, data modelling, and provenance workflows so datasets, definitions, analyses, and handoffs remained traceable, reproducible, and inspectable | Led the transition to a Unix-based production environment using Docker, CI/CD, automated testing, documentation, and collaborative development practices | Designed cloud/Azure-oriented data infrastructure that made heterogeneous analytical datasets easier to retrieve, validate, and reuse

2024 | 2017

PhD Research
Integrative Ecology Lab, Sherbrooke, Canada

Formulated, implemented, and validated mathematical/statistical models for forest dynamics, including Bayesian hierarchical models, simulation workflows, regression-style evaluation, and historical-data routines for noisy, biased, incomplete data | Extracted signal from large historical datasets by harmonizing field inventories, climate, satellite, and spatial covariates into modelling-ready inputs with explicit assumptions and validation checks | Ran thousands of simulations on HPC infrastructure () to test algorithmic assumptions, compare model behavior, and scale analyses beyond local compute | Developed open-source software libraries (,) for demographic modelling with version control, automated testing, documentation, and reusable workflows | Published a technical methods book documenting the full computational pipeline, along with one peer-reviewed publication and two preprints (,)

2022 | 2020 (part-time)

Biostatistician
Environment and Climate Change Canada - Quebec, Canada

Developed a cost-aware probability sampling protocol to improve the spatial representativeness of boreal bird surveys in Quebec under operational constraints | Led client-facing R&D on spatial bias-correction methods for large-scale ecological monitoring data, translating requirements into a method later adopted by other provinces | Engineered a fully automated and reproducible data pipeline with version-controlled workflows, automated documentation, and stakeholder-ready analytical outputs

EDUCATION

2024 | 2017

PhD, Ecology
Université de Sherbrooke - Sherbrooke, Canada

How climate, competition, and forest management shape the limits of tree species distributions: from individuals to metapopulations

2016 | 2015

Masters 2, Agroecology and Resource Management
Bordeaux Sciences Agro, Bordeaux, France

Modelling the dispersion of weed species in agricultural landscapes

2015 | 2010

BSc in Agronomy
Universidade Federal de Santa Catarina, Florianópolis, Brazil

SKILLS

Statistics & Decision Analytics:
Regression · Bayesian inference · Hierarchical models · Predictive modelling · Model validation · Uncertainty · Anomaly investigation

Programming & Database:
Python · R · SQL · Stan · Julia · DuckDB · Bash

Data Engineering & Reporting:
ETL/ELT · Data modelling · Data cleaning · BI-ready reporting · APIs · Azure · AWS · Docker · Parquet · HPC

DevOps & Reproducibility:
Git · CI/CD · Unix · Unit testing · Make · Quarto · Jupyter · Automated validation

OUTREACH

· Developed and maintained the QCBS R Workshop Series, reaching nearly one thousand graduate students · Taught programming, statistics, SQL, and reproducible workflows to 250+ students across biology, engineering, and graduate programs · Translated stakeholder needs into technical analyses, documented pipelines, and clear analytical outputs
